Dear Dr. Borman,

the section of neurology of the UEMS would like to set up a European Board of Neurology. The main object is to have a working group to organize the yearly European examination in neurology involving the newly founded European Academy of Neurology (EAN, founded in June 2014). We have been holding the European Examination for some years with the support of the two European scientific societies in neurology which have now merged into the EAN. This will give a new momentum to our cooperation and we need to have a European Board formally set up.

We hope this request will be favorably received.

With kind regards

Dr. Alexandre Bisdorff
President of UEMS section / European Board of Neurology
